

Joshua Huang

(510)-520-1825 | joh095@ucsd.edu | [linkedin.com/in/joshuahuang22](https://www.linkedin.com/in/joshuahuang22)

EDUCATION

University of California, San Diego – Hahcioğlu Data Science Institute

Bachelor of Science in *Data Science* with *Business Analytics* Minor

Expected Graduation : June 2027

De Anza College

Associate of Arts: *Mathematics*

GPA: 3.89/4.0 Graduated : June 2025

PROFESSIONAL EXPERIENCE

Center for Energy Research (CER) via DS3 UCSD – *Data Science Consultant*

Jan 2026 – Present

- **Synthesized complex oil trade datasets** into actionable insights to define the roadmap for a global energy security analysis, providing a 10-year forecast to assist long-term energy infrastructure planning.
- **Evaluated** the value of the expanding EV market by developing a **Dynamic Dashboard** to monitor growth projections and assess the feasibility of reducing national reliance on traditional petroleum infrastructures.
- **Translated** complex technical methodologies into strategic recommendations for executive leadership, presenting data-driven insights on energy trends to the Director to facilitate high-level decision-making.

Xiang-Shan Temple Enterprise, Hsinchu – *Supply Chain & Data Analyst*

June 2025 – Aug 2025

- Designed and implemented an Excel-based data pipeline for inventory tracking, enhancing process efficiency by **50%** and providing accurate real-time reporting to support decision-making in sales.
- Spearheaded the development of an e-donation system and religious service platform, improving organizational revenue by **30%** through optimized procurement, cutting costs and preventing food waste.
- Directed a data-informed fundraising that raised **\$20K+**, distributing **2,100 kg** of rice and **700** food packs for earthquake recovery to support 200+ families in need, strengthening community disaster response capacity.

Jian-Cang Co, New Taipei City - *Data Analyst Intern*

June 2024 – Aug 2024

- Conducted **data validation and quality checks** on production and material datasets using Python and Excel to ensure operational consistency
- Built **automated Excel dashboards** to track production metrics, improving visibility and decision-making
- **Analyzed** material quality trends and **identified** anomalies early to support proactive issue resolution
- Delivered data-driven insights through **cross-functional collaboration**, improving reporting efficiency.

PROJECTS

Next Up: NBA G-League Call-Up Predictor | Python, Scikit-Learn, XGBoost, Streamlit

[Live App](#) | [GitHub](#)

- Developed a full-stack system using an automated **SportsRadar** API ETL pipeline to aggregate player statistics, official contract logs, and team rosters across 5 seasons (2019–2024).
- Designed predictive models using Python and developed **Logistic Regression** and **XGBoost** models; strategically identify **82%** of potential NBA candidates from G-League within a highly imbalanced dataset.
- Implemented data cleaning, preprocessing, and visualization pipeline in matplotlib and seaborn to analyze model trends. Designed a Streamlit web app with interactive call-up simulators and SHAP visualizations.

Energy Dashboard: Global Energy Dependency | Python, Scikit-Learn, Matplotlib, D3

[Live App](#) | [GitHub](#)

- Built an interactive **data visualization dashboard** analyzing EV adoption and oil imports using Python
- Processed and cleaned large datasets to ensure **data accuracy and reliability for analysis**
- Transformed raw data into **clear, actionable insights** through visual storytelling
- Designed the project to support **policy and infrastructure decision-making**

LEADERSHIP EXPERIENCE

Phi Theta Kappa Honor Society - *President*

Jan 2024 – June 2025

- Directed a **100+** member chapter, leading initiatives to address campus-wide issues, promote student engagement, and expand academic leadership opportunities through the execution of campus-wide projects.
- Represented PTK in campus partnerships and external affairs, strengthening organizational visibility
- Secured chapter recognition as a **Five-Star Chapter** (2024–25) and earned 2nd Place Honors in Action Research Award, demonstrating excellence in leadership, scholarship, and community service.

SKILLS & ACTIVITIES

Technical Skills: Microsoft Excel (PivotTables, data analysis), Microsoft Word, Microsoft PowerPoint, Adobe Suite

Programming & Data Tools: Python (Pandas, NumPy, Scikit-learn, Seaborn), Java, C++, SQL, Power BI .

Operations & Strategy: Logistics Optimization, Resource Allocation, Process Automation, Dynamic Data Visualization.

Languages: English, Mandarin, Taiwanese
